

Join us for a BBTS Webinar

Hosted by Immucor

Tuesday 21st June 2022

14:30 – 15:30 BST, 19:00 – 20:00 BST and 22:00 – 23:00 BST
09:30 – 10:30 EDT, 14:00 – 15:00 EDT and 17:00 – 18:00 EDT

Blood on Board!

The evolution and revolution of transfusions in the pre hospital setting.

With over 70% of the UK's air ambulance charities now carrying blood on board, the introduction of pre hospital blood transfusion has improved the chances of survival in the most critically ill and injured patients.

This webinar invites Dr James Raitt to share guidance and governance around pre hospital transfusions, the logistics and mechanics of providing blood on board and a recent review of patients who were transfused in the pre hospital setting. Kerry Dowling will talk on continued evolutions in pre hospital transfusion, discussing the use of O pos red cells in the emergency roadside setting.

Blood component usage in the pre hospital setting

Dr James Raitt MBChB, FRCEM, FIMC

Consultant in Emergency Medicine and Pre Hospital Emergency Medicine Audit, Improvement and Research (AIR) group lead
Thames Valley Air Ambulance

The use of O pos red cells in the pre hospital setting

Kerry Dowling
